

Flint, Michigan Water Utility Burden by Household Group

Water bill / household income; weighted median for Black and White households, 2016–2021

Household group is based on the race and sex of the household head in the cleaned IPUMS CPS file. Labels show percentages and sampled-household counts. Bars are suppressed when a year-area-group cell has fewer than 30 sampled households. CPUMA refers to Consistent Public Use Microdata Area, a harmonized Census geography used to compare areas across years. Mappable Flint CPUMA geography is available for 2016–2021; 2022–2023 lack reliable CPUMA identifiers and 2024 is absent. Sources: IPUMS CPS microdata; official IPUMS ConsPUMA crosswalk.
